UGEconUIUC #IllinoisEcon http://go.illinois.edu/EconCareers
Obtaining any position requires more than just a college degree & we emphasize the importance of adding additional skills & experiences. Many econ students complete double majors, minors, certificates, take other relevant coursework & participate in leadership opportunities, study abroad, student organizations, internships, volunteer experiences, & are involved in the Department & across campus. The positions we list that current graduates have secured are a combination of their academic and extracurricular experiences, not all students meet the qualifications.

It is important to start developing a professional profile early in college, attending career workshops & events, networking with alumni & employers, & meeting with career advisors. The Department of Economics looks forward to helping you with this process!

The Department of Economics has an Econ Career Center devoted to assisting students in their professional development as they prepare for internships, careers, & graduate school. Services include:

- Career Workshops
- Employer/Alumni/Graduate School Panels
- Etiquette Dinner
- Professional Development Workshops
- Resume, Cover Letter, Personal Statement Reviews
- Mock Interviews
- Personalized Assistance
- Career Exploration

Economics alumni may attend all these events, campus career fairs and informational event, and receive individual assistance from Econ Career Services up to two years following their degree. Beyond two years we will direct you to other recommended resources.

Make An Appointment Today!

Katie Kennealy, Econ Career Coordinator
Stephanie Awad, Econ Career Graduate Assistant
